

Gridlogics announces appointment of Bruce Dullea as Sales Director.

Bruce brings over 20+ years of experience in the field of IP, leadership and executive management to Gridlogics.

Pune, January 7, 2020 - Gridlogics is pleased to announce that Mr. Bruce Dullea has joined our executive team as a Sales Director.

Bruce has more than 20+ years of experience in sales and business development of IP search, analytics and IPMS solutions for the corporate and legal market. Bruce has worked globally at several senior positions in Sales & Marketing for various IP solution companies and helped them build their sales across US, UK and Europe.

Prior to joining Gridlogics Bruce has worked with Retain International, Anaqua, Questel SA, IP.com, CPA Global, Lexis Nexis, MasterFiles and Thomson Scientific. Bruce holds an MBA from Marymount University and a Bachelor in Industrial Engineering from Georgia Institute of Technology, Atlanta.

“I’m excited to join Gridlogics, I have heard about PatSeer for a while from industry colleagues and it is at an exciting cross-road in its growth and looking to take the next step forward with a vision for the future for providing best-in-class IP solutions. It’s an exciting time to be a part of Team PatSeer, and I look forward to getting started” said Bruce.

“We’re excited to bring Bruce on-board to help steer the next phase of growth for PatSeer in the North American market. Bruce’s strong experience in sales, business development and IP strategy complements our existing team and will allow us to build upon our fast growing user base.” said Manish Sinha, CTO, Gridlogics.

About Gridlogics:

Gridlogics is a leading provider of products and custom software solutions for patent research, management, data analysis and project management. With a fast growing user base and more than 4000+ active users across 30 countries, PatSeer is becoming a go to solution for corporations, law firms, service providers and even technology start-ups. Gridlogics leverages the latest techniques in information retrieval, data mining and visualizations to help clients globally in deriving actionable intelligence from the masses of patent data.
