“I am certain that the contribution of Gridlogics to the ASPI program will further facilitate effective search and analysis of technology information, as well as fostering innovation support services in developing and least developed countries and I look forward to hearing of these developments and the use of PatSeer in as many ASPI eligible countries as possible” said Yo Takagi, Assistant Director General, WIPO

Speaking on the occasion, Manish Sinha, Chief Technology Officer of Gridlogics said, “We are pleased to partner with WIPO and offer our global patent database PatSeer to government bodies and research institutions in developing economies via the ASPI program. Being competitive in today’s age requires one to have quick access to critical scientific and research data. Patent databases increasingly capture the largest percentage of worldwide innovation and by leveraging the ASPI program researchers in these countries can benefit from having free or low-cost access to this critical information.

PatSeer makes patent searching, filtering through search results and analyzing patent data easy with its powerful and intuitive user-interface. We are confident that institutions in participating countries will benefit from access to PatSeer and hope that the knowledge and productivity gains lead to an increase in quality and quantity of research being done by them.”

PatSeer Premier Edition, the fully-featured web-based global patent research platform with integrated analytics, project workflow and collaboration capabilities from Gridlogics, will be made available to eligible organizations through the program.
